CT (CUBE Transportation) is an **international freight forwarding** company, which was established in 2018 by experienced industry professionals. As a medium-sized logistics organisation, with a worldwide presence at the most strategically important trading and port centres, we are also proud of ourselves for offering a totally individual service tailored especially to our customers' needs.

Our clients enjoy flexible and tailor-made logistics and transport solutions, coupled with attractive business conditions, available in our one-stop shop. With combined experience, a large office network, qualified staff and a customer oriented approach, CT offers YOU a "Global Transport Solution. We provide service into the following areas-

1. OCEAN FREIGHT
2. AIR FREIGHT
3. ROAD FREIGHT
4. WAREHOUSING
5. CROSS TRADE SHIPPING
6. PROJECT CARGO HANDLING
7. MULTIMODAL TRANSPORT
8. RO / RO TRAFFIC
9. WORLDWIDE NETWORK

OCEAN FREIGHT

Intercontinental sea freight constitutes our core business. Whether LCL or FCL, we provide our customers with perfect, economical and professional order processing from A to Z with short processing time. We have been cooperating with various shipping lines and worldwide agents for years and we are able to guarantee to our customers the best quality at the best conditions. In both export and import, we serve over 400 ports.

We Offer in and outbound Sea Fright traffic as listed below:

1. LCL (Less than Container Load) consolidated cargo services
2. FCL (Full Container Load) worldwide container shipping
3. Special equipment shipments (FR, OT, OH, RF)
4. YIsotank integrated tank container transport (inbound and outbound)
5. Procurement & distribution logistics
6. Worldwide logistics
7. Door-to-door shipment
8. Cross trade shipment

AIR FREIGHT

For being a fast, safe and reliable transport method, airfreight has achieved enormous growth rates. Transport by air is particularly suitable for shipments of extreme urgency with fast transit time, speed and flexibility allowing the goods to reach the world markets on time. Thanks to our dedicated airfreight service, your valuable goods reach their worldwide destinations reliably, safely and promptly. According to your requirements, we endeavour to ensure a smooth process.

We offer in and outbound Air Freight traffic as listed below:

1. Priority airfreight services,
2. Economic airfreight services
3. Domestic transportation (Germany and Europe wide)
4. Partnership with major airlines
5. Transit & project air shipments
6. Procurement & distribution logistics
7. Combined traffic (AIR/SEA)
8. Hazardous material shipments

ROAD FREIGHT

We, as an experienced forwarding company do not only care about the provision and coordination of the trucks and a timely delivery, but also about the appropriate packaging, storage and transport insurance of the freight.

We offer in and outbound Road Traffic as listed below:

1. Road freight distribution and on-carriage services
2. Road freight procurement and pre-carriage services
3. Full truck loads / FTL
4. Less truck loads / LTL
5. Consolidated cargo trucking services
6. Temperature controlled trucking services
7. Reefer-truck services
8. Combined transports road-rail / rail-road
9. Oversized (OOG) and heavy cargo truckingservices
10. Project shipment organization of large lots with customized services
11. Cooperation with reliable, qualified carriers and long-term business partners

WAREHOUSING

In order to ensure an optimization of the transport process, we offer large, fixed storing spaces. Weather-sensitive pieces of material can be stored in the enclosed spaces. We store all kinds of goods and are therefore able to offer a complete range of warehouse logistics. Inventory lists are created for you at least once a month, optimizing the storage space required. Our service includes the commissioning, packaging, un-packaging and pre-assembly of the products from industry and trade. We take care of the planning and design of transshipment activities. With your cooperation, we create an individually developed concept which ensures cost-effective storage, smooth data and information exchange and proper distribution of the goods.

We offer services as listed below :

1. Container loading / unloading
2. FCL & LCL pack station
3. Project and heavy cargo handling,
4. Direct transloading truck-container / container-truck
5. Container reach stacker for lift-on / lift-off movements up to 42 ton gross weight
6. Container storage (also for bonded cargo)
7. Warehousing / bonded customs warehouse
8. Interim storage for import and export goods
9. Shipment securing and packaging
10. Container weighting
11. Labelling, palletisation, foiling

CROSS-TRADE SHIPPING

At CT (CUBE Transportation), we understand that sometimes our customers need to move cargo to and from countries in which they themselves are not based. That is why we have established our cross-trade team, who can help with queries and bookings outside of the country where your business operates. Our cross-trade teams support you with the full range of containerised freight services, in particular dry cargo, refrigerated cargo (reefers), out-of-gauge, precious and hazardous cargo. Our team provides comprehensive services that include competitive pricing, securing bookings, documentation handling, tracking facilities and pre/on carriage arrangements. This means that wherever your cargo is transporting to or from, you'll have a dedicated team supporting you, locally.

PROJECT CARGO HANDLING

With our careful and professional preparation and many years of experience in project loading, we stand by your side and ensure a perfect and safe transport on all traffic routes. By means of your documents / construction drawings, we provide planning and implementation as well as the transport, transshipment and the sea freight for exceptional or non-containerized cargo. We take care of the timely delivery of heavy cargo, loads of extra dimensions or construction vehicles, to the desired destination

Project Handling

Transport of goods that cannot be shipped in containers

Excess length, excess width, excess height

Heavy goods transportation

Arrangement of special permits for road haulage

Expert knowledge in special project handling,

Documentation in accordance with letter of credit and close cooperation with banks,

MULTIMODAL TRANSPORT (RAIL / TRUCK AND BARGE / TRUCK)

As a cost-effective alternative to truck transport on the road, rail transport is an option. With rail freight, goods can be transported reliably and quickly at favourable rates over medium to long distances. We offer rail loads in full containers even in places where the width of the railway changes

RO / RO TRAFFIC

CT is specialized in the worldwide shipment of cars, trucks, trailers and all other self-propelled or rolling cargo. Operating on the world's most important trade lanes, CT moves cargo worldwide on modern and technically advanced deep-sea and short-sea RoRo vessels. With a large fleet of flexible vessels used, we are able to transport all types of vehicles, and also oversized static pieces worldwide.
